

The social network that doesn't want to know your name.

Proof of humanity without proof of identity. PRUF.NET opens 10,000 public beta seats on an iPhone social network designed never to collect personal information, not even an email.

Company	PRUF Systems Inc.
Headquarters	Los Angeles, California
Founder and CEO	Khoi Diep
Product	PRUF.NET, a bot-free, zero-PII social network
Platform	iPhone, public beta through Apple TestFlight
Beta seats	10,000
Requirements	iPhone with Face ID, iOS 18 or later
Personal information	None collected: no name, email, phone number, password or government ID
Biometric data	Face ID and the live-person check run on the device; PRUF never receives or stores facial data
Bots	Bots can't get in. One person, one phone.
Private messages	End-to-end encrypted; PRUF can't read them
Ads	None
Price	Free during beta; the core network stays free
Patents	Four U.S. utility patent applications and international applications filed
Websites	pruf.net · prufsystems.net
Media	media@pruf.net

PRUF Systems Inc. is a Los Angeles privacy technology company building zero-PII human verification: technology that confirms a person is real without collecting or storing who they are. The company has filed four U.S. utility patent applications and international patent applications covering its core architecture. Its first public application, PRUF.NET, is a bot-free social network for iPhone. Learn more at pruf.net.
